turn to the experts

Cooler Than Ever.

DUAL-STAGE
COMPRESSOR

3,000
TON CAPACITY

SMALLER
FOOTPRINT

The AquaEdge™ 19XR is bigger and better than ever, combining the best of chiller design in one compact unit. This low-profile powerhouse features a dual-stage compressor for high-capacity cooling, as well as a semi-hermetic motor, eliminating the release of heat into the mechanical room. The unit also uses R134a refrigerant, allowing for a smaller footprint, which in turn makes for easier installation and service. With a capacity of up to 3,000 tons, this versatile chiller has the power to cool even the largest of spaces. **We go above and beyond to deliver a single-system solution.**
